MAINTENANCE AND CARE

ALUMINIUM

Aluminium has a self-protective layer, which prevents corrosion and makes this material very suitable for outdoor applications. On top of that, it is super easy to maintain. A quick wash with a non-foaming mild detergent every now and then is all it needs!

ACRYLIC ROPE

To clean spots on the rope, we suggest applying a mist of soapy water with a spray bottle and then work the solution into the rope with a soft cloth by patting or rubbing lightly. Rinse the solution thoroughly and then blot excess moisture from the rope using a soft cloth and allow air-drying. Never use a high-pressure hose on acrylic rope!

CERAMIC

If you're looking for a material which requires little to no maintenance, yet offers maximum resistance, you would do well to involve ceramic. The material preserves the natural look of stone and offers top of the chart convenience.

QUICK SHIP SETS FABRIC

All the Kodo products and cushions are available as quick ship sets as well. These products will be shipped within 10 days after reception of the order confirmation, except in case of stock shortage.
