About us	34

"In a very rectilinear world,
we all yearn for a crooked
line from time to time..."

FIGURESSE, A FINE SHAPE OF BATHROOM DESIGN

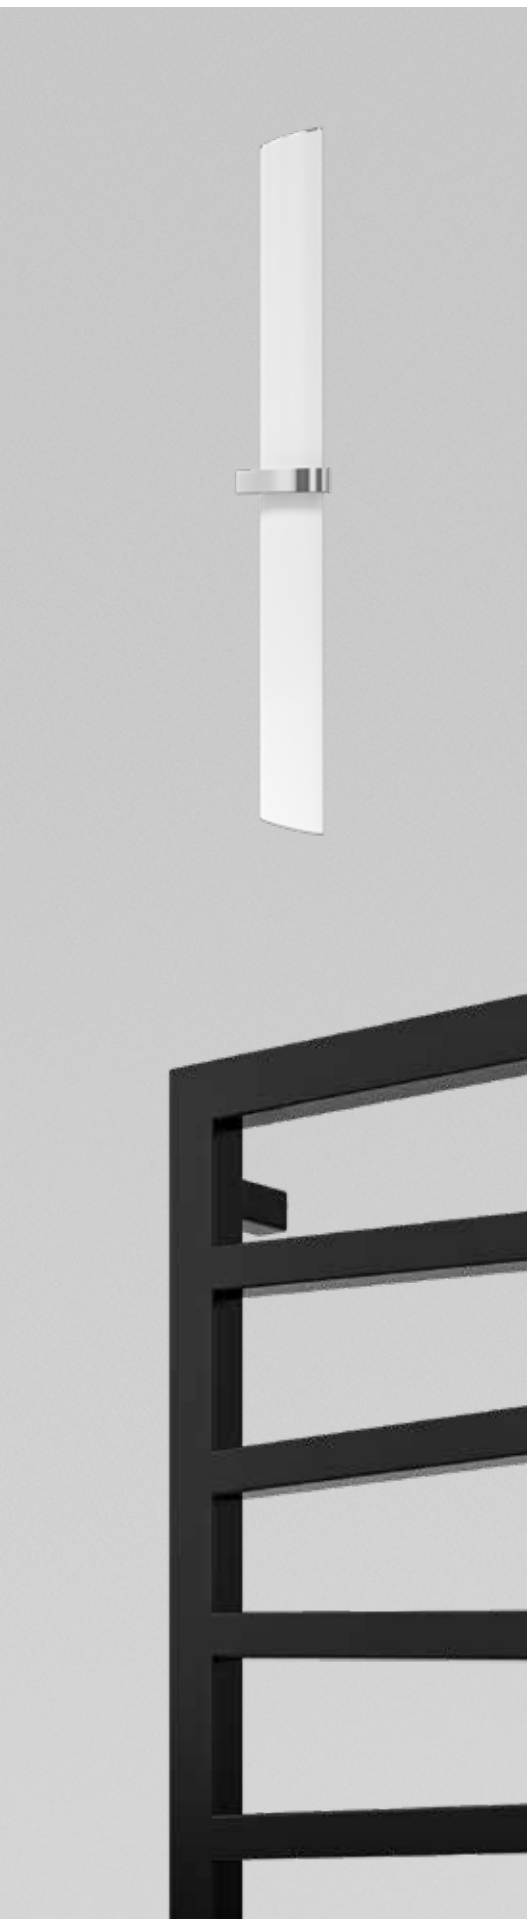

The room where comfort and design is perfectly matched to the user is the room we enter first thing in the morning. In the bathroom we process the first stimuli of the day and we do this preferably in a pleasant warm environment and in an interior that perfectly reflects our person.

This calls for a heating solution that perfectly combines functionality with style.

With the new Figuresse-range of design bathroom radiators, the professional can now also answer the questions of the design-oriented customer:

- Appealing, unusual shapes.
- Hydronic, electric or dual.
- Easy installation.
- user-friendly electric controls.
- 3 trending colours white, matt jet black and matt anthracite grey in stock at all times.

Discover Figuresse.

LET'S FOCUS ON THE FULL PRODUCT LIFE CYCLE AND REDUCE IMPACT ON OUR CLIMATE

As 80% of the environmental footprint of many of our products occurs even before they leave our factories, we invest in sustainable quality and innovation, and take the entire life cycle of our products into account.

We focus on reducing our environmental footprint by using less raw materials, energy and water. We also strive to lower emissions from all production and supply chain operations.

THE PROS OF ELECTRIC HEATING

In some spaces, like the bathroom, there can be a need for short-term and flexible heating. In that case electric heating is the most energy-efficient solution.

Next to this, electric radiators are often problem solvers in renovation projects or areas such as the attic where no central heating is available.

Electric radiators in a nutshell:

- Soft radiant heating creates a pleasant indoor climate for well-being.
- Easy and fast installation without connection to the heating system.
- Combines with solar panels or photovoltaic, self-generated energy can be used.
- Optimal for use outside the heating season.

WARM INSPIRATION FOR THE BATHROOM

A bathroom is not just a place to brush teeth. It's a place to wake up, to have fun with children and it is a little personal SPA at home. A room with great importance for wellbeing. The optimal room temperature for bathrooms with radiators is 24°C and with underfloor heating it becomes cosy from 22°C.

As all-in-one supplier of indoor climate solutions, our advice for the bathroom is to combine a bathroom radiator with underfloor heating.

An electric bathroom radiator is also very useful; it allows you to use the radiator outside the heating season.

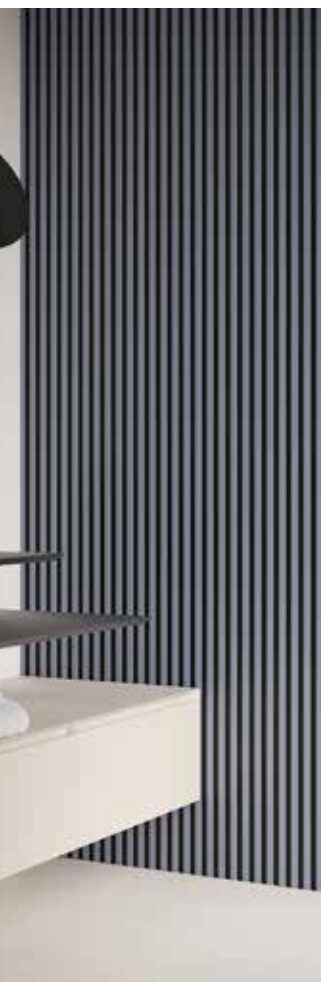

COMFORT AND DESIGN AS A LIFESTYLE

In the bathroom we process the first stimuli of the day, and we do this preferably in a pleasant, warm environment, which brings the necessary tranquillity but also fits in perfectly with the style of the individual standing in front of the mirror.

Perhaps there is a creative person who wants to be stimulated as early in the day as possible by an aesthetic interior. Or maybe someone who is more nostalgic and at home in a mid-century-inspired interior. Or someone who loves the country feel that a rural interior brings, or the simplicity and cleanliness of a modern minimalist interior.

The space, environment and world that you step into in the morning (and that you end the day with), should be perfectly suited to you. And that also counts for visible heating elements in the bathroom, like Figuresse bathroom radiators.

“The door to the bathroom is a gateway to well-being for the body and mind”

Unsure where the radiator will be installed?

No problem! If the bathroom is turned upside down once again, this radiator can do that too. Simply turn it around and mount it. The open design creates space for a lot of textiles and you can choose which side of the gate should remain open. Left or right? Decide for yourself.

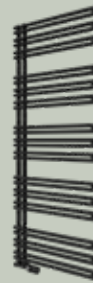

GATE

Round heating elements, organized in separate sections and mounted on double collecting pipes, gives the impression of a gate. With its round shapes, it is a pleasant companion for natural trends in the bathroom. The radiator offers enough space for multiple bath towels.

HYDRONIC VERSIONS

Gloss white
RAL 9016

Matt Jet Black
RAL 9005

Matt Anthracite Grey
RAL 7016

ELECTRIC VERSION

White
RAL 9016

FEATURES & BENEFITS

- Easy hanging and plenty of space for drying towels.
- Simple and user-friendly control.
- Left and right version in one model.
- Available in hydronic, electric and dual versions

RASP

With its flat shape and very thin structure, this bathroom design radiator fits perfectly on the wall. It becomes a part of the interior and raises it to a new level. The 90° angled slim rectangles provide enough space for drying towels.

HYDRONIC VERSIONS

Gloss white
RAL 9016

Matt Jet Black
RAL 9005

Matt Anthracite Grey

RAL 9016

FEATURES & BENEFITS

- Provides plenty of space for drying towels.
- Simple and user-friendly control.
- Classic centre connection for easy installation.
- Available in hydronic, electric and dual versions

“A space that feels like home
gives roots to grow ”

Too many towels and not enough space to dry them?

Radiators with generous openings at different heights provide a solution. In the twinkling of an eye, there is enough space for all the towels and bath towels of the entire extended family.

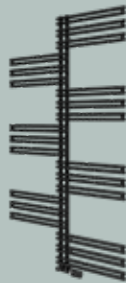

TWIST

The Twist consists of round heating tubes that are grouped into individual sections which are oriented both to the left and to the right. The perfect balance for everyday use with enough space to comfortably dry your towels.

HYDRONIC VERSIONS

Matt Jet Black
RAL 9005

Matt Anthracite Grey
RAL 7016

ELECTRIC VERSION

White
RAL 9016

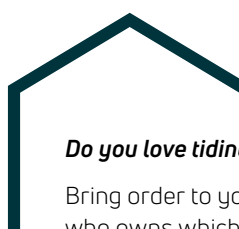

FEATURES & BENEFITS

- Provides plenty of space for drying towels
- Rotateable as the Gate
- Simple and user-friendly controls
- Classic centre connection for easy installation
- Available in hydronic, electric and dual versions

"A welcoming environment gives the perfect twist to inner balance"

Do you love tidiness and that includes your bath towels?

Bring order to your bathroom with the Twist. You can even specify who owns which side of the radiator and there will be no more mess.

“A creative environment provides new insights”

FEATURES & BENEFITS

- Extremely flat design and oval shape bring variety to the room
- Thanks to the smooth surface, the Ellipse is particularly easy to clean
- Available with one or two towel rails
- Simple and user-friendly control
- Classic centre connection for easy installation
- Available in hydronic and electric versions

ELLIPSE

With its exceptional shape, the Ellipse is a true eye-catcher in any interior. This elliptical design bathroom radiator steps away from all standard contour lines and traditional profiles, and takes us to a completely new dimension in bathroom design. The radiator is delivered with a practical towel holder.

HYDRONIC VERSIONS

RAL 9016

"A refreshing space lifts the mood and promises a sense of independence"

Cold fingers and cold feet - quickly under the shower in the warm bath.

With the Impulse E, thanks to the special material properties, heat is available practically at the touch of a button. This is how comfortable heating works today.

IMPULSE

This towel warmer breaks out and does not follow straight lines. With its wavy shape, it creates new impulses for the design of any bathroom and brings unpredictable possibilities. The radiator is delivered with a practical towel holder.

HYDRONIC VERSIONS

Matt white
RAL 9016

Matt Jet Black
RAL 9005

Matt Anthracite Grey
RAL 7016

ELECTRIC VERSION

Matt white
RAL 9016

FEATURES & BENEFITS

- Extremely flat construction and wave shape turn the radiator into a design element
- Thanks to the smooth surface, the Impulse is particularly easy to clean
- Available with one or two towel rails
- Simple and user-friendly control
- Classic centre connection for easy installation
- Available in hydronic and electric versions

COLOURS

- We keep the three trending colours; Matt Jet Black, Matt Anthracite Grey and White in stock for the entire Figuresse range at all times.

SQUASY

The square heating pipes arranged asymmetrically between the frame make this bathroom radiator a special eye-catcher. Its asymmetric shape makes it fall out of the norm and brings life to any room.

HYDRONIC VERSIONS

Gloss white
RAL 9016

Matt Jet Black
RAL 9005

Matt Anthracite Grey
RAL 7016

ELECTRIC VERSION

White
RAL 9016

FEATURES & BENEFITS

- Provides plenty of space for drying towels.
- Simple and user-friendly control.
- Classic centre connection for easy installation.
- Available in hydronic, electric and dual versions

"Trendy, modern and smart, a place for freshness and liveliness"

You know the classic “where’s my favourite shirt” emergency?

Normally it’s followed with the response “it’s in the laundry”. But your radiator can be a great help - a clothes horse with a built-in heater, just pop the shirt on and it will be dry in no time.

SQUARA

The square heating tubes of Squara, which are symmetrically welded between the frame of the manifolds, create a simple, calm form. The same construction of the design radiators Squara and Squasy creates a combination of symmetry and asymmetry.

HYDRONIC VERSIONS

Gloss white
RAL 9016

Matt Jet Black
RAL 9005

Matt Anthracite Grey
RAL 7016

ELECTRIC VERSION

White
RAL 9016

FEATURES & BENEFITS

- Provides plenty of space for drying towels.
- Simple and user-friendly control.
- Classic centre connection for easy installation.
- Available in hydronic, electric and dual versions

"A bath in the garden invites you to dream."

Out of the wet and into the cosy warm bathrobe!

That's how it should be after every bath. Your child will love it - the cosy feeling of being welcomed by a warm bathrobe from mum or dad after an adventurous trip in the bath. And you? Maybe you will too!

"Having your own palace in the house creates a royal feeling"

A small niche for a great radiator

There is little space in the bathroom, but the narrow elegant radiator always finds a niche in which it is shown off to great advantage and gives you a warm, cosy bathrobe.

SLIM

The Slim design radiator promises perfection and complements the classic style with its vertical, slender shape. It blends with the interior and becomes a sculpture in your bathroom. This radiator also comes with an elegant towel rail.

HYDRONIC VERSIONS

Gloss white
RAL 9016

Matt Jet Black
RAL 9005

Matt Anthracite Grey
RAL 7016

ELECTRIC VERSION

White
RAL 9016

FEATURES & BENEFITS

- Narrow shape requires little space in the room.
- Simple and user-friendly control.
- Classic centre connection for easy installation.
- Available in hydronic and electric versions

BAR

Aesthetically pleasing with core functionality. The "Bar", with its horizontal design creates the appearance of a towel holder and surprises with its function as a heating element.

In combination with underfloor heating, this radiator provides a pleasantly warm bathroom and is the ideal element for preheating and quickly drying bath towels.

This electric towel warmer has a control unit with touch technology and is available with 60 or 120 watts.

ELECTRIC VERSIONS

Gloss white
RAL 9016

Matt Jet Black
RAL 9005

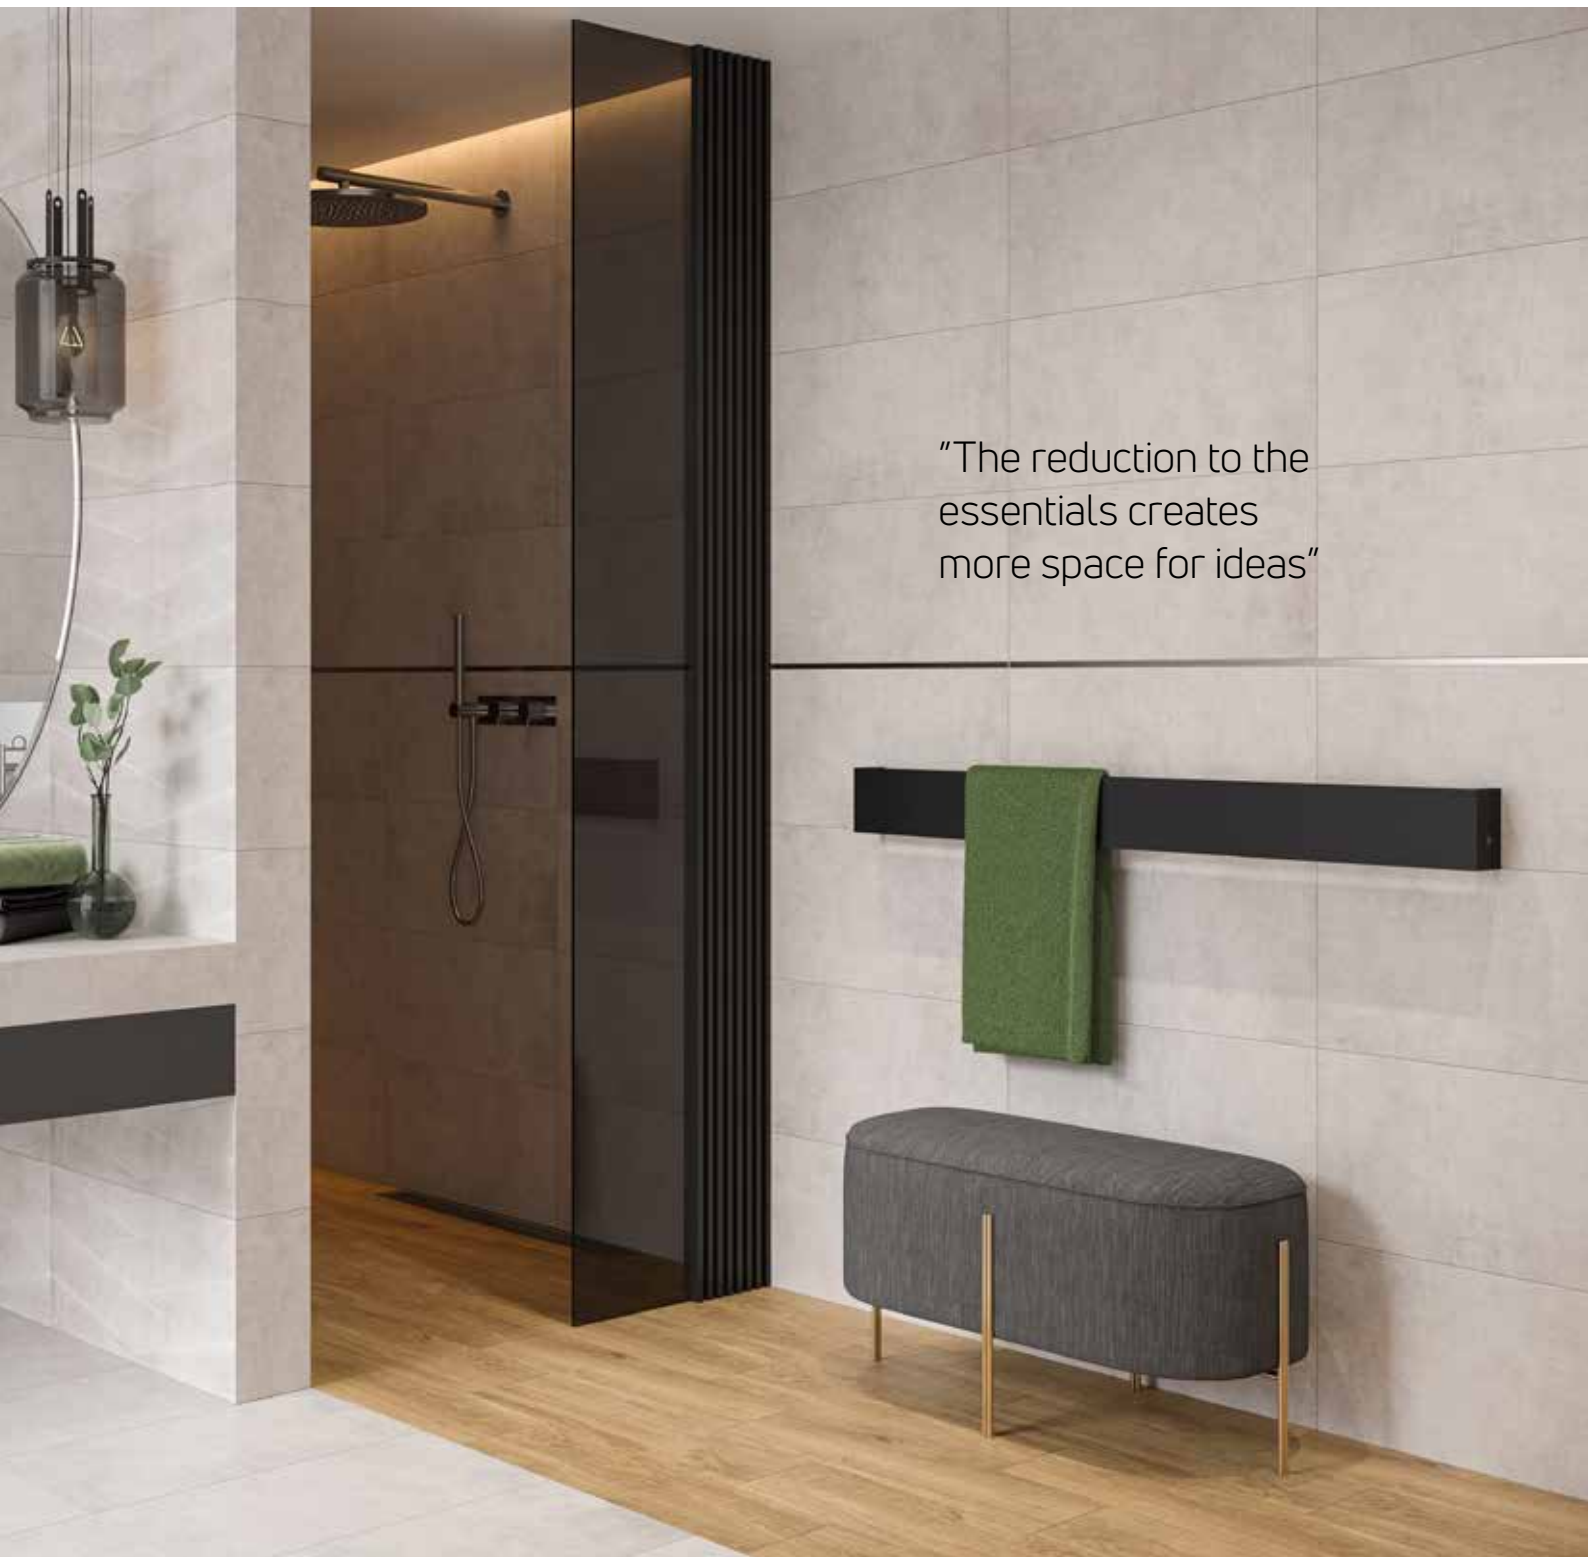

Matt Anthracite Grey
RAL 7016

FEATURES & BENEFITS

- Unattractive sockets are part of the past, thanks to hidden cable routing
- Switch on and off simply by pressing a single button

“The reduction to the essentials creates more space for ideas”

Heating at the touch of a button?

That works wonderfully with the Bar. Switch on the towel bar with a button and towels are dried.

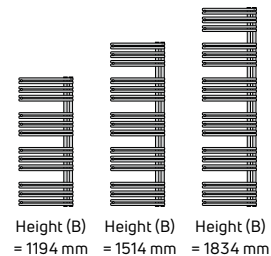

TECHNICAL SPECIFICATIONS

In order to keep our products, customer service and environmental care, a source of pride for us and our partners, we continuously operate within accepted quality standards at every functional step and stage. Figuresse radiators are warranted for a period of 5 years and electric components 2 years.
